Math 129 - 010 Calculus II

MWF 1-1:50

PSYCH 207

Instructor: Alex Henniges

Email: henniges@email.arizona.edu

Office: Math 509

Phone: (520) 621-6883

Course Webpages: <http://math.arizona.edu/~calc/m129.html>, <http://d2l.arizona.edu>

Office Hours: Monday 2-3:00, Wednesday 2-3:00, Thursday 9:30-10:30

General Information: Covered in the Department's 129 policy statement.

Communication: It is the student's responsibility to keep informed of any announcements, syllabus adjustments or policy changes made during scheduled classes, by email, or through D2L. I am always happy to answer questions through email at my earliest convenience.

Attendance: Students are expected to attend every scheduled class and to be familiar with the University Class Attendance policy as it appears in the General Catalog.

Academic Integrity: Covered in the Department's 129 policy statement.

Student Code of Conduct: Covered in the Department's 129 policy statement.

Classroom Behavior: Students should put away all electronic devices during the class unless the device is deemed necessary for the class by the instructor. This includes, but is not limited to cell phones and mp3 players. Laptops should only be used for note-taking if desired, but should not be used for leisure or completing webassign assignments during class.

Homework: (100 points) Working on homework problems is necessary for success in this class. Homework will come in two forms: written and online.

Written homework will be assigned about once a week and will be due the following week. Homework is to be turned in at the beginning of class. No homework submitted after that will be graded, no exceptions. You may work with others to understand the material in the course as well as the homework, but every individual must write up their own solutions and no two homeworks should look alike. ***Work must be shown and answers simplified for full credit.*** Homework problems will be assigned from your textbook and can be found on d2l under the contents page along with their due dates. Assignments will be added and updated throughout the course.

Homework should be handwritten and all pages should be stapled together with your name on the first page. Individual homework will be worth 20 points. I may not grade every problem and some problems will be worth more than others. At the end of the semester, the lowest two written homework grades will be dropped, and the remainder of the scores will be averaged to compute a written homework percentage grade. The final grade for written homework will be scaled to 35 points.

There will also be online homework on WebAssign, www.webassign.net. Online homework assignments will be given on the webassign course web page, along with their due dates. At the end of the semester, the 3 lowest online homework grades will be dropped, and the remainder of the scores will be averaged to compute an online homework percentage grade. The final grade for the online homework will be scaled to 65 points. Hence, the total points for homework is 100 points.

Instructions for WebAssign: To create an account for this class go to <http://webassign.net>, click on the I Have a Class Key button. Our class key is **arizona 6010 2930**. You must do this even if you have used WebAssign in the past or are using it for another course this semester. There is a 14-day grace period (from the first day of classes) before you must purchase/ submit your access code for this class. Each time you log-in, you will see a reminder.

In-Class Exams: (300 points) The four in-class exams are tentatively scheduled for Wednesday, September 16; Monday, October 12; Friday, November 6; and Friday, December 4. Each exam will be worth 75 points.

Students who are unable to attend an exam should notify me as soon as possible. Arrangements for a make-up test will be considered on a case by case basis. Make-up exams will be administered at my discretion. If a student is allowed to make up a missed exam, they must take it at a mutually arranged time. No further opportunities will be extended. Failure to contact me as stated above will result in a grade of zero on the exam.

Final Exam: (200 points) The final exam is a comprehensive common department exam. It is scheduled for **Monday, December 14 from 8:00-10:00 am**. Locations will be announced in December. See the Department's 129 policy statement for more information.

Grades: The components of the course grade will be weighted as follows:

Homework/Quizzes	100 points
Midterm Exams	300 points
Final Exam	200 points

The total number of points available on tests and homework is 600. Grades will be no lower than those set forth in the following table

540 to 600	90% to 100%	A
480 to 539	80% to 90%	B
420 to 479	70% to 80%	C

360 to 419	60% to 70%	D
0 to 359	0% to 60%	E

Note: A grade of C or better in Math 129 is a necessary prerequisite for Math 215 (Linear Algebra), Math 223 (Vector Calculus), and Math 254 (Differential Equations). Students who receive a D in Math 129 will receive credit for the course towards graduation requirements, and will be able to use their course for the general education math requirement, but will not be automatically qualified to register for Math 215, 223, or 254.

Accessibility and Accommodations: Covered in the Department's 129 policy statement.

Withdrawal: Covered in the Department's 129 policy statement.

Incompletes: Covered in the Department's 129 policy statement.

Changes to the Course Syllabus: The information contained in the instructor's course syllabus, other than the grade and absence policies, as deemed appropriate by the instructor, are subject to change with reasonable advance notice. In particular, the dates of midterm exams, the number of exams, and the order in which topics are covered may differ from the dates and arrangement in the tentative weekly schedule.
