

Course: Math 129 – Calculus II
Section: 002
Times: MWF 11 – 12:45
Text: *Calculus* 5th Ed. Hughes- Hallet, et al.

Instructor: Chris Jewell
Office: MATH 309
E-mail: cjewell@math.arizona.edu
Office Hours: To be announced

Attendance

Daily attendance is expected from every student. Students who miss the first class meeting will be administratively dropped unless they have made other arrangements. In addition, students with more than 3 unexcused absences may be administratively dropped from the course (See Administrative Drop Policy at <http://catalog.arizona.edu/2009-10/policies/classatten.htm>.) If you need to miss class for unavoidable circumstances, see me as soon as possible.

Calculators

A graphing calculator is an important tool and will be useful for this course. Calculator use will generally not be permitted during exams.

Grades

Breakdown of points:

Homework/Quizzes	150 points
In-class exams total	300 points
<u>Final exam</u>	<u>200 points</u>
<i>Total possible points</i>	650 points

Grades will be no lower than the following scale

585 – 650 points	90 – 100%	A
520 – 584 points	80 – 89%	B
455 – 519 points	70 – 79%	C
390 – 454 points	60 – 69%	D
0 – 389 points	0 – 59%	E

A grade of Incomplete will be given only at the instructor's discretion, according to University Policy as described at <http://www.registrar.arizona.edu/gradepolicy/incomplete.htm>

In-class Exams

There will be three in-class exams. All exams are closed-book and closed-notes. Each test will be worth 100 points. The exact dates of the in-class exams will be announced in class at least two days in advance. Any questions regarding the grading of exams need to be cleared up within one week after the exam has been returned. The exams will **not** be curved and there is **no** extra credit.

Missed Exams

Students are expected to be present for all exams. If a verifiable emergency arises which prevents you from taking an in-class exam at the regularly scheduled time, you must notify me as soon as possible, and in any case, prior to the next regularly scheduled class. Make-up exams will be administered only at the discretion of the instructor. If a student is allowed to make up a missed exam, (s)he must take it at a mutually arranged time. No further opportunities will be extended. Failure to contact me as stated above or inability to produce sufficient evidence of a real emergency will result in a grade of zero on the exam.

Final Exam

There is a comprehensive final exam. The final exam is worth 200 points. The Final Exam is on Wednesday, **July 7, 2010 from 11:00 a.m. to 1:00 p.m.** Please do not arrange to leave town prior to this date as this exam will only be given on the date scheduled by the University. The University's Exam regulations for final exam week will be strictly followed. More information and a study guide can be found at <http://math.arizona.edu/~calc>.

Homework/Quizzes

Homework and quizzes together represent 150 points of your final grade. Homework will be submitted in two formats: a computer grading program called WebAssign will be used, along with "traditional" hand-written homework. Each format will be worth 75 points.

The hand-written homework assignments can be found by following the [Homework Assignments](#) link from the course homepage (<http://math.arizona.edu/~cjewell/summer129>). You will find a list of assignments, each in the form of a pdf file. You are expected to print the relevant assignment, and complete your work on those sheets.

Student accounts for WebAssign can be purchased on-line at <http://www.webassign.net>. You need a "Class Key" to access the correct class. The Class Key for this course is **arizona 2066 5167**

On the homework webpage, you will also find a set of homework labeled '*recommended*'. This is exactly what the name suggests: these are problems which should be done for your benefit- they should not be taken lightly. Even though you will not receive any direct credit for the recommended problems, doing them will pay dividends: you will find the required problems much more bearable if you have first done the recommended problems which will usually form a basis for the more difficult required ones.

At the end of the semester, an appropriate number (roughly 10%) of the lowest homework scores of each type (including missing assignments) will be dropped. Each will then be scaled down to a score out of 75. Other in-class assignments may also be given and counted in the homework/quiz score.

Discussion of homework problems ("working together") is encouraged, but each student is required to write his/her OWN solutions. Students are advised to seek help whenever needed. Students are also encouraged to ask questions during office hours and to use the free tutoring available.

Specific Homework Procedures:

- Homework is due at the beginning of the class period. No exceptions.
- Multiple pages should be STAPLED together. Crazy corner origami is NOT a staple.
- Each problem should be neatly written, with all intermediate steps included and the problem number clearly marked. Written explanations should be included whenever appropriate. If necessary, answers should include units. Graphs should be neat and have units clearly labeled.
- Answered should be clearly indicated (boxed, circled, highlighted, etc.)
- Correct answers not supported by work will not receive credit.

Any assignments not meeting these guidelines may not be accepted or not graded.

Homework is an essential component of the course, whether it is assigned for grading or not.
