Text: Tabor, *Principles and Methods of Applied Mathematics* (class notes)
Course Content: dynamics of nonlinear systems, complex variables, Fourier series and transforms, Schwartz distributions
Prerequisite: calculus, differential equations, matrix theory

Hour exam: October 14
Final Exam: December 16, 2:00PM–4:00PM
Missed Exams: Missed exams must be justified in writing before the exam and must be approved by the instructor. (In extreme emergency the mathematics office may be telephoned before the exam, with the message that a letter is on the way.) Justification for missing an exam due to a conflict with another scheduled activity must be submitted the first week of classes.
Scores for Missed Exams: A score for a justified missed exam will be assigned based on the average of the other exams. A missed final exam will result in a grade of I or E.
Homework: There will be regular homework assignments. No credit will be given for late work, unless it is justified in advance, in writing.

Grading:	Hour Exam	100 points
	Home work:	200 points
	Final Exam:	200 points

The numerical scores will be converted to letter grades at the end of the semester. The grading system is that given in the General Catalog (A – Excellent, B – Good, C – Fair, D – Poor, E – Failure). Higher numerical scores will give the same or higher letter grades. The actual cutoff points will depend on the general performance of the class and on the difficulty of the exams. Other possible grades are W (withdrawal passing weeks 5 through 8), WP (complete withdrawal passing), WF (complete withdrawal failing). The last two are appropriate for complete withdrawal from the University by the last class day.

Withdrawal:	September 19	last drop with deletion
	October 17	last drop with W or E
	After October 17	drop with E (or WP or WF if withdrawing from University)
