

## Selected Student Reviews:

- Mr. Powell was an excellent instructor and I learned a lot from him. He would always attempt to answer any questions on the content in different ways until whoever asked was satisfied. I would definitely take another course instructed by him! (*KJ McLaws, Trigonometry class, Fall 2014*)
- Mr. Powell is a great Professor, he does whatever he can do, to make you understand lecture and lesson through class. (*Luis Carlos Arochi, Trigonometry class, Fall 2014*)
- Kevin made a great TA. He found ways to keep us students engaged during the differential equations discussion such as doing group work and creating competitions. Kevin also ensured that we understood the material no matter how long it took. I appreciate the work he put into the role of a teacher's assistant. (*Anonymous, Differential equations recitation section, Spring 2014*)
- Professor Powell was the reason I did well in differential equations. He explained the topics clearly and was thorough. I would recommend him highly. (*Anonymous, Differential equations recitation section, Spring 2014*)
- Kevin Powell, was my Teacher assistant in introductory differential equations. he was very prepared, and very knowledgeable when it came to the applications of differential equations, he also utilized group group engaging activities, so we could learn group skills. he demonstrated passion about mathematics while performing mathematics. (*Anonymous, Differential equations recitation section, Spring 2014*)
- Kevin Powell is among the finest professors from whom I have had the pleasure of learning. In summer of 2011, I earned a B grade in calculus 1 with him as a professor. In 2013, when I saw that he was teaching Calculus 2, I jumped at the chance to learn from him again. Dr. Powell is a caring professor with a

passion for instruction. Once, when I was absent from class, he took the initiative and sent me the slides for the section I missed nearly immediately after the class was over, demonstrating his desire that all his students have the resources they need to become proficient in the material. Despite his kind demeanor, Dr. Powell's classes and assignments are by no means an easy A. He is rigorous, and his exams are challenging. Fortunately for his students, his skill in teaching makes his classes possible with enough work from his students. (*Anonymous, calculus I and II, Summers 2011, 2013*)

- Kevin Powell was the Teaching Assistant for the Differential Equations class I took in the spring of 2014. In our weekly discussion meetings he went out of his way to answer everyone's questions. Mr. Powell clearly made material comprehension his number one concern every week and it really helped me grasp the difficult material." (*Robert Miller, Differential Equations Recitation Section, Spring 2014*).
- I would say you're a very nice, responsible teacher! Last year, it's my first year in U.S.. Everything is new to me, but I felt comfortable in your class and understood mostly. I like the way you teach personally. (*Anonymous, Trigonometry, Fall 2014*)
- Kevin Powell takes difficult concepts and and teaches them on a simple scale. I found it very beneficial learning from the way Mr. Powell teaches, a lot of examples and a controlled pace so everyone in the class can comprehend the material and move forward together." (*JT Westling, Trigonometry, Fall 2014*)
