Celebrating Women in Mathematics

What is it?

SK Day is a day-long mathematics workshop for high-school students who are interested in math. There are talks, activities and prizes so that the students can get some hands-on experience with different mathematical fields. Students have the chance to meet professional women who do math for a living.

Who's involved?

SK Day is run by the women graduate students in the Mathematics Department at the University of Arizona.

How can I sign my students up?

We're so glad you asked! We are looking for three enthusiastic math teachers to bring 15 students each to spend the day with us! If you are interested, our website is:

<http://math.arizona.edu/outreach/soniakovday.html>

Please let us know if you'd like to be a part of this day by **Feb. 15, 2013**.
