MathCats Announcements and Reminders

- Congratulations to all of our MathCats members! We officially have 49 paid members, which is a club record! Let's keep building on the awesome momentum we've already established and recruit more members while simultaneously outreaching to the community!

MathCats Upcoming Events

- Tomorrow, **October 2nd at 5:30 PM in Math 501** Esther Widiasih will give a presentation through the UTA program which has been consistently providing great opportunities for all math majors. All MathCats members are encouraged to attend this event! (**Worth 2 points!**)

Did you know??

According to the Mathematical Association of America:

One of the benefits of studying mathematics is the variety of career paths it provides. A 2009 study showed that the top three best jobs in terms of income and other factors were careers suited for math majors. Another recent survey shows that the top 15 highest-earning college degrees have a common element: mathematics.

To find out more about what careers are available to you, visit the link below:

Symbol to Learn: Δ
Delta, change in.
Definition:
Δx means a (non-infinitesimal) change in *x*.

Get To Know Your UA MathCats Officers:

Rachel Barroso

Vice President of Event Coordination

"Hey Y'all! My name is Rachel Barroso and I'm acting as the Stand-in VP for Event coordination as well as the liaison between MathCats and the UA Science Ambassadors program this year. I am a Honors double major in Applied Mathematics and Chemical Engineering with the intension of pursuing a career in industry once I complete my undergraduate experience. Once upon a time I considered myself artsy and loved painting, my piano, and putting on theatrical productions. Since college started, I've had barely enough time for homework and a few recreational events, so I took up biking and hiking with my fiancé. I have a slight obsession with Queen and would spend all of my weekends cooking and dancing to my Pandora Radio stations if I had the choice. As a final hurrah and a tribute to my grand-dad: Education, Education, Education! "

Dilbert of the Week:

Have a great week!
