

**Reflection 3**

Do not forget to respond to the comments I made on Reflection 2.

1. ***Before reading***, write a paragraph about the following questions:
  - a. Who do you think of as doing mathematics?
  - b. Who do you think of as discovering/inventing the mathematics we do in school?
  - c. Where is mathematics in our daily lives?
2. Read the following articles (available on D2L):
  - a. Zaslavsky (2001)
  - b. Leonard & Guha (2002)
3. Write a short paper (about 500 words) in which you address the following prompts:
  - a. Compare and contrast your answers to question 1 with what you read in these articles.
  - b. How do the examples raised in these two articles compare and contrast with your own experiences learning mathematics?
  - c. What were the major arguments Zaslavsky made? What do you agree with and what do you disagree with? Why?
  - d. What were the major arguments that Leonard & Guha made? What do you agree with and what do you disagree with? Why?
