

Reflection 6

We discussed some of these issues in class and I have shared some of my opinions. Your answers here should be ***your own views/opinions***, not the views of the class, me, or the authors.

1. Reread what you wrote for *Reflection 1: What is Math to You?*
2. Write a short paper (at least 500 words) in which you respond to the following prompts:
 - a. Has your thinking changed or evolved at all since *Reflection 1*? If so how and why? If not, why not?
Be sure to reflect on all aspects of the course: (a) in class lessons/activities, (b) homework assignments, (c) reflections, (d) projects, and (e) exams.
 - b. Reflect on what else you have learned this semester.
3. Write a short story (at least 250 words) that illustrates how you envision teaching math as a future teacher.
