

Fraction Equivalence

Write an equal groups problem for each of the following equivalent fractions. Your problem should be written in a way that it can solicit either form of the fraction as the answer. Provide examples of ways each problem can be solved in both ways.

1. $\frac{5}{3}$ or $1\frac{2}{3}$

2. $\frac{9}{4}$ or $2\frac{1}{4}$

3. $\frac{4}{6}$ or $\frac{2}{3}$
