POSTDOCTORAL FELLOWSHIPS

Postdoctoral fellows are immersed in the topics of the MBI's emphasis year programs. The MBI postdoctoral fellow will engage in an integrated program of tutorials, working seminars or journal clubs, participation in workshops, and interactions with local and visiting mentors. These activities are geared toward providing the tools to pursue an independent research program with an emphasis on collaborative research in the mathematical biosciences. MBI facilitated activities for postdoctoral fellows are tailored to the needs of each young scientist. The program provides training in bioscience fundamentals to the mathematically oriented fellow as well as mathematical fundamentals to the bioscience oriented fellow.

The postdoctoral program includes both regular postdoctoral fellows and sponsored postdoctoral fellows. You may apply to one or both.

APPLYING FOR AN MBI POSTDOCTORAL FELLOWSHIP

All requirements for a doctorate must be completed by **August 31, 2009**. The doctoral degree can be in any of the mathematical, statistical and computational sciences, or in the biological, medical, and related sciences.

The following materials must be submitted and should arrive by **January 16, 2009**. Late applications will also be considered if positions are still available.

1. The MBI application form submitted electronically (<http://www.mbi.osu.edu/forms/papp.html>) or sent via US Postal Service, to:

Mathematical Biosciences Institute
The Ohio State University
Jennings Hall, 3rd Floor
1735 Neil Avenue
Columbus, OH 43210

2. Personal statement of scientific activities and accomplishments, future research plans, and reasons for wishing to participate in the program.
3. Curriculum vitae and a list of publications.
4. Three letters of recommendation sent directly to the MBI.

For more information about our postdoctoral fellowship program, please visit our web site at:
<http://www.mbi.osu.edu/postdoctoral/postdoctoral.html>

The MBI receives major funding from the National Science Foundation Division of Mathematical Sciences and is supported by The Ohio State University. The Mathematical Biosciences Institute adheres to the AA/EOE guidelines.
