

# Student Information Sheet Math 111 - 005/008 Plane Trigonometry Fall 2011

Name:

Student ID number:

Local phone number (or cell):

Email address:

Major/field of interest:

How comfortable are you with general algebra and arithmetic? Do you feel prepared for this class?

Have you taken trigonometry before? If so, which were the most difficult topics for you?

Do you need to take another maths class after this one? If so, which one(s)?

Overall, how do you feel about maths? What made you feel that way?

Tell me something interesting about yourself that will help me remember you. (Good exmple: I can whistle in fifty different ways. Bad example I am 5'11".) Be creative! These are fun to read.

Are there any questions you want to ask or any comments you wish you make?

Please be aware of the following:

- No extra credit is given - this is a department policy which I have no control over.
- Tests are worth \*much\* more than homework, but completing homework is the key to success in tests.
- Office hours/individual meetings are \*very\* important, be sure to use this free resource!
